Tesi di Laurea Magistrale in Ingegneria per L'Ambiente e il Territorio

Geochemical Investigation of Arsenic in Drinking Water Sources in Proximity of Gold Mining Areas within the Lake Victoria Basin, in Northern Tanzania

Relatore:

Prof. Rajandrea Sethi
DIATI, Politecnico di Torino

Candidato:

Enrico Lucca
220333

Co-Relatore:

Prof. Prosun Bhattacharya
*Division of Land and Water Resources Engineering
KTH Royal Institute of Technology, Sweden*

Luglio 2017

Table of contents

1. INTRODUCTION	1
1.1 The Problem of Arsenic in Drinking Water	1
1.2 Problem Definition	2
1.3 Aim and Objectives of the Present Study	2
2. BACKGROUND	4
2.1 Distribution of Arsenic in The Environment	4
2.2 Sources and Geochemistry of As in Water	4
2.2.1 Arsenic in natural water	5
2.2.2 Arsenic in mine waters	6
2.2.3 Weathering of sulphide minerals	7
2.2.4 Adsorption-desorption	8
2.2.5 Reduction of Fe-hydroxides	9
2.3 Health impacts	9
2.4 Arsenic in Tanzania	10
2.4.1 Health impacts cases in Tanzania	12
3. THE STUDY AREA	14
3.1 General Characteristics of Lake Victoria Basin	14
3.1.1 Population and economy	15
3.2 Geology	16
3.3 Topography and Hydrological Setting	19
3.4 Hydrogeology	21
3.5 Gold Mining Activities	22
3.5.1 Small Scale Mining	23
3.5.2 Large Scale Mining	24
3.6 Drinking Water Sources	26
3.6.1 National drinking water points map	27
4. METHODOLOGY	28
4.1 Sampling Strategy	28

4.1.1 Location of the drinking water sources	30
4.2 Sampling Methodology	30
4.3 Field Investigations	31
4.3.1 pH, EC, Temperature and Redox Potential	31
4.3.2 Arsenic Test kit	32
4.4 Laboratory analysis	33
4.4.1 Major anions	33
4.4.2 Major cations and trace elements	34
4.4.3 Accuracy of major ions analysis	35
4.4.4 Dissolved Organic Carbon (DOC)	35
4.5 Data Management and Interpretation	35
4.5.1 Excel	35
4.5.2 R-software	36
4.5.3 ArcGIS	36
4.5.4 AquaChem	37
4.5.5 PHREEQC and geochemical modelling	37
4.6 Limitations	38
5. RESULTS AND DISCUSSION	39
5.1 Results of Field Measurements and Laboratory Analyses	40
5.1.1 pH, Redox potential and Electrical Conductivity	42
5.1.2 Major ions	43
5.1.3 Other major elements	48
5.1.4 Dissolved Organic Carbon (DOC)	48
5.1.5 Al, Fe, Mn	49
5.1.6 Arsenic	52
5.1.7 Other trace elements	59
5.2 Relations Between Different Geochemical Parameters	59
5.2.1 Local geology and solubility controls on the distribution of major ions	60
5.2.3 DOC	67

5.2.4 As	69
5.3 Geochemical Modelling	75
5.3.1 Saturation Indexes	76
5.3.2 Aqueous species distribution	78
6. CONCLUSIONS	80
6.1 Final Recommendations	81
BIBLIOGRAPHY	82
APPENDIX A. Hydrogeological map of Tanzania	87
APPENDIX B. Water sampling procedure	88
APPENDIX C. As concentration maps	90
APPENDIX D. Sampling location and results of field measurements	93
APPENDIX E. Results of water analysis: major ions	95
APPENDIX F. Results of water analysis: trace elements	97
